- Responsive Mega Menu
- OSC MageAdmin
- Sales Order Report by Payment Type

Magento® Experience

Integration of Magento® with Various Third Party System

- Handle Third Party Product Feed
- Created Shipping Feed, interacting with drop-shipper using XML & API
- Mobile Application Development For Magento®
- Magento® Enterprise code review & recommendation

Case Study

e-Commerce Store (Magento® Enterprise - 1.13.0.1)

Store Front:

- Huge catalog of Over 3 Million of In Stock Products with Total Catalog handling of 10 Millions products (around 80 GB Database) which are in circulation at Present
- Introduced additional cache flushing for real time data update effect in front end
- Modified Solr populate code to improve search results
- Populate customized collection using Solr

Case Study

e-Commerce Store (Magento® Enterprise - 1.13.0.1)

Back-end Automation:

- Product feed with 3 Million SKUs are processed & products are created or updated
- Product Removal from Catalog: Removing Products that were unavailable for last 6 months from Magento® to cut down increasing Data size
- Receiving Acknowledgment Feeds and Shipment Feeds from feed Providers for Orders, auto-creating Invoices, Handling the Full Shipment and Partial Shipments for every Ordered Item

Case Study

e-Commerce Store (Magento® Enterprise - 1.13.0.1)

Performance Optimization:

- Optimize Indexing to reduce memory & time required for data processing
- Remove & add triggers to effectively render views in real time with data update
- Optimizing Scripts to Reduce the Feeds Execution Time

Case Study

e-Commerce Store (Magento® Enterprise - 1.13.0.1)

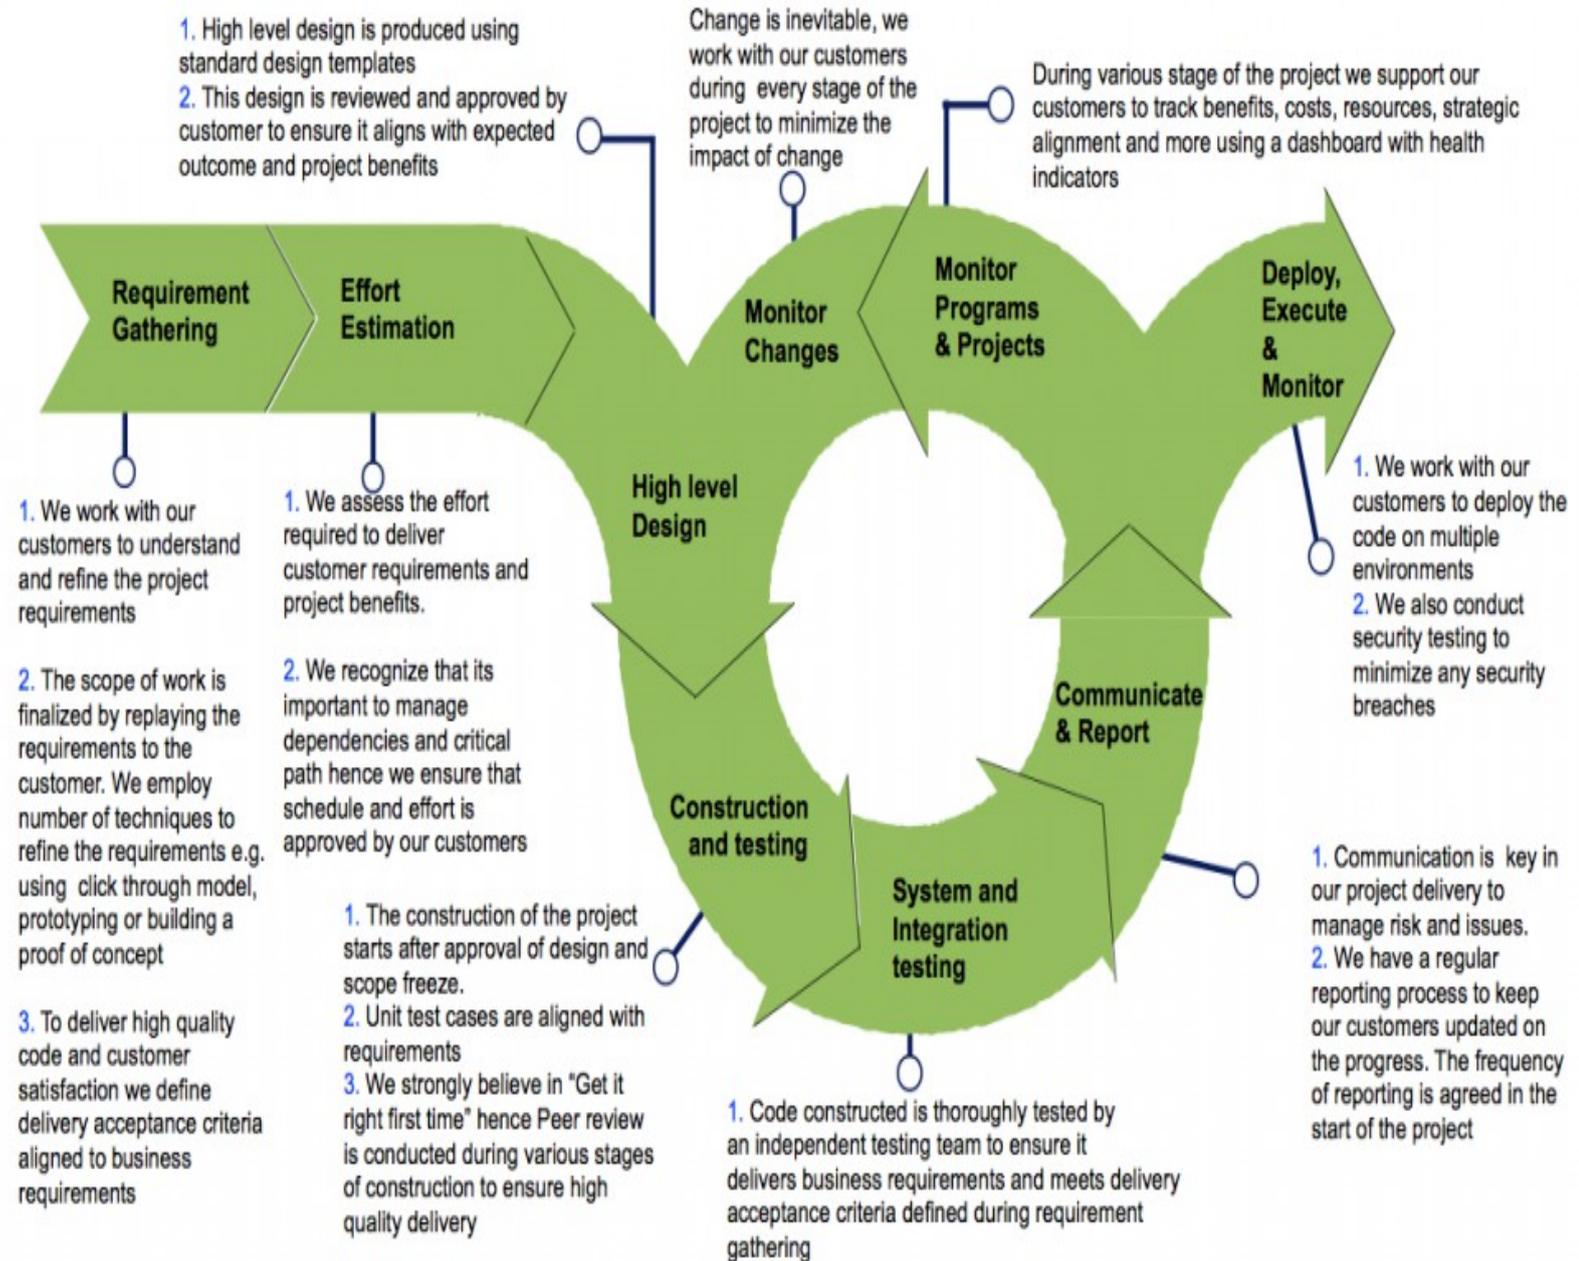

Performance Optimization:

- Pre-populate Container Cache after Data feeds execution
- Customizing partial Indexing to reduced memory requirements
- Populate Solr Server on indexing, so as to reduce MySQL load

Project Management Practice

- Initiation
- Development Phase

Business Delivery Model

Time and Material

- In this model, we work with end-to-end need and execute the Project
- Client is billed for Hourly rate as per requirement

Fixed

- Cost Price for complete Project is Pre-negotiated before kick-off
- This model gives out best deliverable if scope is clear

Business Delivery Model

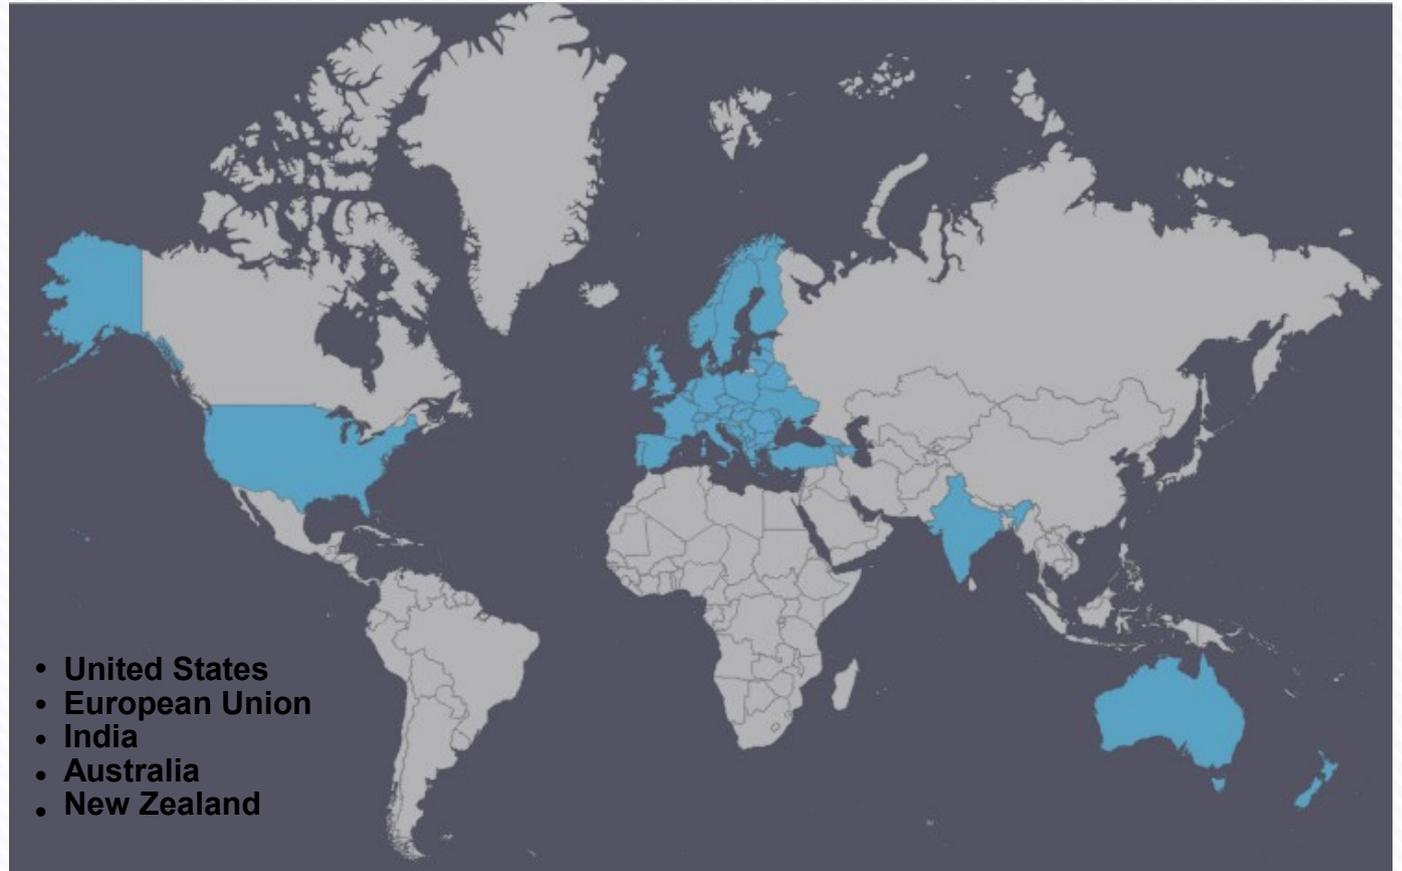

Hybrid

- Major part of project is developed according to fixed price model
- Further Customization is done according to Time and material model
- This helps client to optimize the project delivery without compromising with project budgets
